

Keeping ahead *with* Frame Marking

Beetek plastic frames will now include both a Beetek logo and a year marking. We want you to know that by buying a Beetek frame you are not only buying NZ's most widely used and accepted plastic frame but you are also buying a quality product, made in New Zealand, from quality food-grade materials.

A new date stamp has also been added to help beekeepers keep track of frame age. Towards the end of each year we'll roll this over for the coming years season.
